

## Senior Power BI Developer

Bravo LT needs you to be a part of our highly motivated group of technology experts. We share a passion for technology and the community we serve, and we are committed to building long-lasting, productive relationships. We focus on giving back to the community, positively impacting society, and providing quality solutions that work. We believe in *autonomy*, *mastery* and *purpose* and in trusting people to do the right thing - and we think Bravo LT is a pretty great place to be a part of.

As a Bravo LT Sr. Power BI Developer, you'll be the wizard behind the scenes, crafting and maintaining Business Intelligence solutions that will drive strategic decision-making and fuel our business growth. From designing robust data models to developing interactive dashboards and reports, you'll transform raw data into valuable insights that will revolutionize how the business makes decisions. If you are obsessed with data and how organizations can use it better, this could be the role for you.

### Responsibilities

- Work with stakeholders including the Executive, Product, and Data teams to understand objectives, important metrics, and how they measure business performance.
- Creates visualizations for all parts of the company that empower them to make business decisions.
- Develops, secures, and maintains data and reporting according to best practices.
- Accounts for the accuracy of the data presented to internal customers through the execution of validation processes and testing procedures.
- Updates job knowledge by researching new business intelligence techniques, tools, and processes.
- Assemble large, complex data sets that meet business requirements.
- Builds analytics tools that provide actionable insights into customer acquisition, operational efficiency, and other key business performance metrics.
- Identifies and defines new process improvement opportunities.
- Creates ad-hoc reports and analysis.
- Ability to troubleshooting and analyze issues
- Regularly provide guidance and training to less experienced team members

### Basic Qualifications

- Bachelor of Science degree
- Proven track record of creating clean code and usable data based reports
- Solid understanding of object-oriented software design and related patterns
- Experience with Power BI and Power BI services
- Experience with DAX inside of Power BI
- Experience with performing SQL development and/or query work
- Ability to work in an Agile environment
- Experienced with optimization techniques for Power BI reports
- Technical expertise regarding data models, data mining and segmentation techniques
- Strong interpersonal and communication skills and the ability to interact with a diverse group of clients and colleagues at a high degree of professionalism
