

Senior Mobile Software Engineer

Bravo LT needs you to be a part of our highly motivated group of technology experts. We share a passion for technology and the community we serve, and we are committed to building long-lasting, productive relationships. We focus on giving back to the community, positively impacting society, and providing quality solutions that work. We believe in *autonomy*, *mastery* and *purpose* and in trusting people to do the right thing - and we think Bravo LT is a pretty great place to be a part of.

The Bravo LT Senior Mobile Software Engineer possesses a deep understanding of the analysis, design, implementation, testing, and maintenance of mobile applications. A strong foundation in computer science, and mobile development ecosystem. If this sounds like you, reach out!

Responsibilities

- Translate business requirements and user stories into functional applications
- Design and build advanced applications for both iOS and Android platforms using Swift and Kotlin, focusing on creating high-quality, scalable, and maintainable mobile applications.
- Work on cross-platform solutions, collaborating closely with UI/UX designers to create user-friendly, intuitive interfaces.
- Maintain and optimize code for efficiency in development, improve application performance, maintain code quality, and ensure automatization.
- Collaborate with other developers, product managers, and stakeholders to define, design, and ship new features.
- Conduct rigorous tests, fix bugs, and streamline performance to ensure the robustness of the application.
- Document all aspects of the application for future maintenance and upgrades; provide detailed reports on development processes, software updates, and other relevant information.
- Focus on user-centric development, addressing user feedback, and continuously improving user experience.
- Mentor junior developers, promoting a culture of learning and collaboration within the team.
- Manage projects, ensuring deadlines are met and deliverables align with company standards.

Basic Qualifications

- Hold a Bachelor's or Master's degree in Computer Science, Engineering, or a related field.
- Have at least 5 years of professional experience in mobile application development with a proven track record in iOS and Android applications.
- Possess strong skills in Swift for iOS development and Kotlin for Android development.
- Be familiar with tools and frameworks that support cross-platform development.
- Understand the full mobile development life cycle, including automated testing and building.
- Exhibit excellent analytical and problem-solving abilities.
- Experience with hybrid mobile applications and their development
- Demonstrate strong interpersonal and communication skills for effective team collaboration.
- Commit to continuous learning and staying updated with the latest advancements in mobile application development.
- Have keen attention to detail and a passion for delivering high-quality user experiences.
- Show proven ability to manage projects, prioritize tasks, and meet deadlines.
