

## Senior Software Developer

Bravo LT needs you to be a part of our highly motivated group of technology experts. We share a passion for technology and the community we serve, and we are committed to building long-lasting, productive relationships. We focus on giving back to the community, positively impacting society, and providing quality solutions that work. We believe in *autonomy*, *mastery* and *purpose* and in trusting people to do the right thing - and we think Bravo LT is a pretty great place to be a part of.

The Bravo LT Sr. Software Developer possesses a deep understanding of the analysis, design, implementation, testing, and maintenance of web applications, with a strong focus on the backend. This person should possess a foundation in computer science and Object Oriented Programming. In this role you'd have the challenge of supporting a legacy system while helping to create a new EDI Web Services platform using the latest technologies.

### Responsibilities

- Partner in the design, architecture, and vision of a software platform
- Assist in making architectural choices based in-house hosted and cloud hosted applications
- Strong knowledge of and experience in back-end development
- Excellent problem-solving skills
- Helps drive risk assessment by developing, implementing and evaluating system design strategies, specifications and models.
- Provides process leadership for work groups and assists in product/service delivery strategy and work plans.
- Validates proposed applications align with the architectural design and with business needs
- Drives process leadership for work groups, and product/service delivery strategy and work plans
- Ability to troubleshooting and analyze issues
- Regularly provide guidance and training to less experienced team members

### Basic Qualifications

- Bachelor of Science degree
- Proven track record of creating great architecture and clean code
- Solid understanding of object-oriented software design and related patterns
- Expert in .NET/C# design and web services development
- Experience with database development using PL/SQL or SQL
- Experienced designing and developing applications leveraging AWS
- Experience with architecture and coding web services
- Nice to have - experience with legacy development technologies like C++
- Strong interpersonal and communication skills and the ability to interact with a diverse group of clients and colleagues at a high degree of professionalism
