BravoLT

Sr. Scrum Master

Bravo LT needs you to be a part of our highly motivated group of technology experts. We share a passion for technology and the community we serve, and we are committed to building long-lasting, productive relationships. We focus on giving back to the community, positively impacting society, and providing quality solutions that work. We believe in autonomy, mastery and purpose and in trusting people to do the right thing - and we think Bravo LT is a pretty great place to be a part of.

The Scrum Master will act as a facilitator for the product owner and the team. They will work to remove any impediments that are obstructing the team from achieving its sprint goals and will also work to advise the product owner about how to maximize ROI for the team.

Responsibilities

- Lead a team in Scrum, help plan sprints, and uncover ways to help the team improve
- Work with delivery members to evolve into highly productive teams
- Lead daily stand-ups, sprint planning sessions, sprint reviews/demos, sprint retrospectives, and product backlog refinement
- Coach individual team members and help resolve processes and conflicts that interrupt workflow
- Estimate and plan useful, reliable, and practical strategies for software development projects
- Work with product owner to ensure product backlog is appropriately prioritized prior to sprint planning
- Work with the Release Train Engineer (RTE) to ensure the Agile Release Train (ART) meets its overall Program Increment (PI) objectives
- Assists the product owner in preparing and refining the backlog for PI planning

Basic Qualifications

- Experience leading teams through Scrum ceremonies, such as: sprint planning, daily scrum, sprint review, sprint retrospective, and product backlog refinement
- Ability to multitask, adapt, and operate in a high-speed environment
- Strong interpersonal communication skills to effectively work with stakeholders, as well as resolve conflict among team members

Preferred Qualifications

- Holds a Certified Scrum Master (CSM) or SAFe Scrum Master certification
- Working knowledge of Scaled Agile Framework (SAFe)
- Experience with stakeholder management, negotiation, and communication skills
- Basic understanding of continuous integration and continuous deployment (CI/CD), test-driven development (TDD), unit testing, pair programming, automated testing, agile games
- Experience working as a developer or in a technical capacity is desirable
