**BravoLT**

# Senior Salesforce Developer

Bravo LT needs you to be a part of our highly motivated group of technology experts. We share a passion for technology and the community we serve, and we are committed to building long-lasting, productive relationships. We focus on giving back to the community, positively impacting society, and providing quality solutions that work. We believe in autonomy, mastery and purpose and in trusting people to do the right thing - and we think Bravo LT is a pretty great place to be a part of.

The Bravo LT Senior Salesforce developer will help a dedicated CRM team achieve their business goals. you will be part of leading projects (or a phase of a project) to successful completion and mentor less senior team members.  APEX, typescript and javascript development skills will be needed in this role.  If this sounds like you, let's talk!

## Responsibilities

- Work closely with product owners, stakeholders, and developers
- Translate business requirements and user stories into functional applications
- Design, build, test, and maintain reusable and reliable code
- Ensure the best possible performance, quality, and responsiveness of the applications
- Identify and devise solutions to problems with functionality or performance of the applications
- Help maintain code quality, organization, and automation
- Convey the vision and goals to their team for each new feature prioritized.
- Collaborate with various internal departments to ensure Salesforce environment supports internal needs relating to functionality and performance
- In-depth understanding of the capabilities and constraints of the SFDC CRM application.
- Develop and maintain APIs, scripting, and custom code within Salesforce Cloud to enhance its functionality and extend its capabilities.

## Basic Qualifications

- Proven experience as a Salesforce CRM Developer, with a strong understanding of the platform's features, capabilities, and best practices.
- Experience with Salesforce Identity
- Demonstrated experience working in medium to large scale Salesforce implementations (Service, Sales and Marketing)
- Proficient with Apex, VisualForce, Triggers, Force.com, Web Services, Lightning, Native, MySQL and JavaScript
- Experience with Continuous Integration and delivery (Atlassian - JIRA, Bamboo, Bitbucket)
- Experience with web development frameworks and technologies.
- Solid understanding of CRM principles and practices.
- Must have Salesforce developer certification(s)
