

Senior Java Developer

Bravo LT needs you to be a part of our highly motivated group of technology experts. We share a passion for technology and the community we serve, and we are committed to building long-lasting, productive relationships. We focus on giving back to the community, positively impacting society, and providing quality solutions that work. Our mission is to empower others through compassion, professionalism, and the power of technology.

The Bravo LT Software Developer possesses a deep understanding of the analysis, design, implementation, testing, and maintenance of web applications, from the backend to the frontend. A strong foundation in computer science, the Java language ecosystem, and modern web technologies are required.

Responsibilities

- Translate business requirements and user stories into functional applications
- Design, build, test, and maintain reusable and reliable Java and JavaScript code
- Mentor junior and intermediate developers
- Ensure the best possible performance, quality, and responsiveness of the applications
- Identify and devise solutions to problems with functionality or performance of the applications
- Help maintain code quality, organization, and automation

Basic Qualifications

- Bachelor's degree or master's degree in Computer Science or closely related field
- Five or more years of experience developing software
- Solid understanding of object-oriented software design and related patterns
- Expert in the Java programming language
- Experience using the Spring Boot and the Spring Framework
- Experience using modern software architecture, such as SOA, SOAP, and REST
- Experience writing or maintaining externally-facing APIs (SOAP and/or REST APIs)
- Experience with relational databases and SQL
- Strong interpersonal and communication skills and the ability to interact with a diverse group of clients and colleagues at a high degree of professionalism
- Able to manage time effectively

Preferred Qualifications

- AWS architecture design and configuration
- Containerized cloud environments, including Docker, GCP, and Kubernetes
- Using web application frameworks, such as Angular, Ember, or React
- Working in a large organization/enterprise environment
- MVC frameworks (i.e., ASP.NET MVC or Angular)

Location: Remote (Grand Rapids, MI)
