

DevOps Engineer

Bravo LT needs you to be a part of our highly motivated group of technology experts. We share a passion for technology and the community we serve, and we are committed to building long-lasting, productive relationships. We focus on giving back to the community, positively impacting society, and providing quality solutions that work. We believe in autonomy, mastery and purpose and in trusting people to do the right thing - and we think Bravo LT is a pretty great place to be a part of.

In this role you will need to have academic or professional experience using Kubernetes and GitLab to enable development activities. This role involves using these skill sets to create bare metal virtualization.

Responsibilities

- Advise on implementing day-to-day DevOps operations and maintenance
- Implement and maintain a DevOps approach to build and deliver highly scalable, reliable enterprise systems
- Develop high-performance environments where software can run on bare-metal and virtual environments
- Collaborate with development team and peers to manage code releases
- Advise on installing new servers and maintains the server infrastructure, diagnose hardware and system issues
- Assist in systems design and documentation as needed
- Perform data/cluster backups and disaster recovery operations as necessary
- Perform other DevOps duties as required

Requirements

- Create and manage CI/CD pipelines with git based source code versioning system (i.e., GitLab)
- System administration knowledge on bare metal technologies to manage enterprise infrastructure
- Experience working in agile application development practices
- Experience with Kubernetes on bare metal
- Experience scripting with BASH
- Knowledge of container orchestration platform Kubernetes
- Deployment and maintenance of Docker
- Experience working in DevOps practices and tools in cloud-based enterprise
- Experience working in virtualization and containerization/serverless computing environments
- Ability to perform performance testing
- Ability to work independently with minimal supervision

Desired Education

Bachelor of Science degree

Location: REMOTE
