

Senior AWS Cloud Engineer

Bravo LT needs you to be a part of our highly motivated group of technology experts. We share a passion for technology and the community we serve, and we are committed to building long-lasting, productive relationships. We focus on giving back to the community, positively impacting society, and providing quality solutions that work. We believe in autonomy, mastery and purpose and in trusting people to do the right thing - and we think Bravo LT is a pretty great place to be a part of.

As a Senior Cloud Engineer at Bravo LT you will be tasked with helping a group of clinical developers shift their development platform to AWS. A strong background in AWS architecture, python and pipeline creations/implementation is core to this role.

Responsibilities

- Advise on implementation of day-to-day DevOps operations and maintenance
- Establish relationships with key technical and non-technical decision makers to help drive long-term cloud adoption to resolve business problems and develop impactful solutions
- Collaborate with development team and peers to manage code releases
- Assist in systems design and documentation as needed
- Provides technical expertise and advice to application development teams to guide cloud adoption
- Mentor and empower development team members in cloud technologies

Requirements

- Create and manage CI/CD pipelines
- Strong experience with CDK
- System administration knowledge with cloud technologies, such as AWS, to manage enterprise cloud infrastructure
- Experience with:
 - Working in an Agile software development framework
 - Scripting in Python
 - Managing automation/configuration platforms, ideally Ansible
 - Working in DevOps practices and tools in cloud-based enterprise
 - Working in virtualization and containerization/serverless computing environments
 - Creating EKS and MSK clusters, or basic knowledge
- Ability to migrate integrations from legacy platforms to AWS
- Ability to work independently with minimal supervision

Location: REMOTE
