

Senior Facets Engineer

Bravo LT needs you to be a part of our highly motivated group of technology experts. We share a passion for technology and the community we serve, and we are committed to building long-lasting, productive relationships. We focus on giving back to the community, positively impacting society, and providing quality solutions that work. We believe in Autonomy, Mastery and Purpose and in trusting people to do the right thing - and we think Bravo LT is a pretty great place to be a part of.

As a Senior Facets Engineer, you will work with other team members to deliver solutions for business users. Deep knowledge of Facets data models and applications is essential - in particular, Claims, Provider, Member, Billing and Plan. Experience developing and maintaining Facets extensions and batch jobs is also key. Strong business and technical communication skills, including demonstrated ability to translate between the two is essential. In the role, you'll also be responsible for gathering *some* business requirements for enhancements, alongside a dedicated business analyst.

Responsibilities

- In cooperation with Business Analysts, gather business requirements and translate that information into detailed technical specifications from which programs will be written or configured
- Validate that proposed applications align with the architectural design and with the business needs
- Troubleshoot application problems, identify interdependencies, and implement new solutions
- Devise or modify procedures to solve problems, considering software applications capacity, resource availability, operating time and form of desired results
- Responsible for research, architecture, design, installation, integration, support and optimization on a wide variety of technologies as a part of the information technology infrastructure and application environment
- Advocate for and drive best practices throughout the system
- Provide technical project leadership, often leading work on new implementations and upgrades of related systems and handling multiple projects simultaneously
- Assists in technology road mapping in a SAFe (Scaled Agile Framework) environment
- Actively participates in Program Increment (PI) Planning Days each quarter
- Communicates regularly, openly, and honestly with team lead
- Raises concerns appropriately to mitigate issues

Skill & Experience Requirements

- Must be comfortable with Engineering and Analyst work relating to Facets
- Experience in healthcare/health insurance
- Experience working with Facets and health plan data
- Experience within database development, specifically PL/SQL
- Experience with C#, .NET or Java is needed
- Experience building web services and/or API is critical
- Experience with Informatica PowerCenter is a plus
- Strong written and oral communication skills with ability to interpret technical requirements
- Excellent analytical skills to troubleshoot and resolve systems problems
