

## Business Architect

Bravo LT needs you to be a part of our highly motivated group of business and technology experts. We share a passion for technology and the community we serve, and we are committed to building long-lasting, productive relationships. We focus on giving back to the community, positively impacting society, and providing quality solutions that work. We believe in autonomy, mastery and purpose, and in trusting people to do the right thing - and we think Bravo LT is a pretty great place to be a part of.

The Bravo LT Business Architect will possess a deep understanding of executing business goals and strategies within a large enterprise in the healthcare insurance industry. You will assist in transitioning the organization from an "IT centric" mindset to a "business centric" mindset. Outlining, structuring, and defining large business initiatives at the enterprise level is an essential task in this role. You will develop and modify processes to resolve complex issues along with translating goals into desired business results. If you have a passion for solving problems, defining business processes, guiding organizational governance, and building KPI's, this role is for you.

### Responsibilities

- Develop strong relationships within the enterprise as well as within application teams to serve as an expert at the intersection between the portfolio and the applications that support it
- Align the organizational goals and strategies in the transition from an "IT centric" organization to a "business centric" organization
- Actively works with stakeholders to define goals and strategies, and document appropriately
- Serve as a consultant and advisor on a seven (7) person strategic business partners team
- Advise on current processes and assist in making strategic changes to aid the growth of the organization
- Lead the efforts around building KPI's that represent the business needs and tracks their progress accordingly
- Lead risk assessments and root cause analysis efforts
- Effectively communicates to stakeholders the project statuses and options to resolve complex business and technology issues
- Provide mentorship to team members and stakeholders

### Qualifications

- Deep understanding of how healthcare insurance, in particular Medicare Advantage (MA) suppliers, operate
- Experience with leading the research and analysis of defining large and complex organizational processes, scopes, and objectives for developing new or improving existing processes
- Over 5-years of experience in supporting business side projects within Medicare Advantage suppliers (preferred)
- Demonstrated success in running projects as a liaison between business units and application teams
- Experience with enhancing business processes and building KPI's
- Experience with executive level communications
- Strong presentation and communication skills with a consultative approach
- Proficiency in Microsoft Office and a variety of information systems
