

## Business Analyst

Bravo LT needs you to be a part of our highly motivated group of technology experts. We share a passion for technology and the community we serve, and we are committed to building long-lasting, productive relationships. We focus on giving back to the community, positively impacting society, and providing quality solutions that work. We believe in Autonomy, Mastery and Purpose and in trusting people to do the right thing - and we think Bravo LT is a pretty great place to be a part of.

The Bravo LT Business Analyst (BA) will possess a deep understanding of organizational business goals and how to achieve them. This role will assist in outlining, structuring, and defining large business initiatives and integrations. This person will also develop or modify processes to resolve complex issues along with translating goals into desired business results. If you have a passion for solving problems, defining business processes, guiding organizational governance, and building KPI's, this is the role for you!

### Responsibilities

- Understands all implications of current and existing business environment, and leads the research and analysis of defining large and/or complex organizational processes, scopes and objectives for developing new, or improving existing processes
- Actively works with all project stakeholders and users to define needs and requirements, and documents appropriately according to project plan
- Leads creation of written support documentation and ensures knowledge transfer between teams and individuals involved in support functions
- As part of a team look at current governance processes and assist in making the correct changes to aid the businesses growth
- Effectively facilitates project meetings
- Assist in building KPI's that represent the business needs and tracks their progress accordingly
- Leads risk assessment, correctly defines problem statement, and leads root cause analysis efforts
- Effectively communicates to leadership the project status and options to resolve complex technology issues
- Provides mentorship to less senior team members, and functions as a resource for expertise in business systems analysis. Seen as an expert in the industry outside of the organization

### Qualifications

- Bachelor's degree or equivalent experience as a Business Analyst (BA)
- Demonstrated success in running projects as a liaison between business units and third-party integrations
- Track record of successfully enhancing business processes and building KPI's that successfully track those changes
- Proven ability to lead projects through successful execution to completion
- Strong presentation and communication skills with a consultative approach
- Proficiency in Microsoft Office and a variety of information systems
