

## Software Developer, Java

Bravo LT needs you to be a part of our highly motivated group of technology experts. We share a passion for technology and the community we serve, and we are committed to building long-lasting, productive relationships. We focus on giving back to the community, positively impacting society, and providing quality solutions that work. Our mission is to empower others through compassion, professionalism, and the power of technology.

The Bravo LT Software Developer possesses an understanding of the analysis, design, implementation, testing, and maintenance of web applications, from the backend to the frontend. This position has a strong emphasis on backend development. A strong foundation in computer science, the Java language ecosystem, and modern web technologies are required.

### Responsibilities

- Translate business requirements and user stories into functional applications
- Design, build, test, and maintain reusable and reliable Java and JavaScript code
- Ensure the best possible performance, quality, and responsiveness of the applications
- Identify and devise solutions to problems with functionality or performance of the applications  
Help maintain code quality, organization, and automation
- Aid the team developing solutions inside of a complex product with large amounts of data

### Basic Qualifications

- Bachelor's degree or master's degree in Computer Science or closely related field
- Five or more years of experience developing software
- Solid understanding of object-oriented software design and related patterns
- Skilled in the Java programming language
- Experience using the Spring Boot and the Spring Framework
- Experience using modern software architecture, such as SOA, SOAP, and REST
- Experience writing or maintaining externally-facing APIs (SOAP and/or REST APIs)
- Experience with relational databases and SQL
- Experience in Javascript frameworks
- Strong analytical skills that lend themselves well to the breakdown of complicated products
- Strong interpersonal and communication skills and the ability to interact with a diverse group of clients and colleagues at a high degree of professionalism
- Experience with Hibernate and JPA
- Able to manage time effectively

### Preferred Qualifications

Desired experience with:

- Oracle PL/SQL
- Large Oracle Databases
- Containerized cloud environments, including Docker and Kubernetes
- Working in a large organization/enterprise environment
