

Senior Quality Assurance (QA) Analyst

Bravo LT needs you to be a part of our highly motivated group of technology experts. We share a passion for technology and the community we serve, and we are committed to building long-lasting, productive relationships. We focus on giving back to the community, positively impacting society, and providing quality solutions that work. We believe in autonomy, mastery and purpose and in trusting people to do the right thing - and we think Bravo LT is a pretty great place to be a part of.

The Bravo LT Senior QA Analyst possesses a deep understanding of testing web applications, from the backend to the frontend. You will be responsible for manual testing in this role, but there are many opportunities to help bring automation to this team. A strong foundation in testing tools such as Postman is desired along with the ability to query SQL data and a background in Jira make you an excellent candidate for this role.

Responsibilities

- Work closely with the scrum master, developers, business analysts, and stakeholders in an Agile development environment
- Review user stories and requirements to provide timely and meaningful feedback
- Create detailed, comprehensive and well-structured test plans and test cases
- Estimate, prioritize, plan, and coordinate testing activities
- Design, develop and execute automation scripts using testing tools, such as Postman
- Demonstrated understanding and use of SQL with Database Application development (ETL) techniques.
- Identify, record, document thoroughly and track issues
- Participate in Agile iterative development activities with development team

Skill Requirements

- Exceptional interpersonal communication skills
- Exceptional technical writing skills
- Ability to ask questions and help craft/clarify user stories
- Ability to partner with developers to troubleshoot
- Experience helping developers succeed in technical demos
- Strong aptitude in technical complexities
- Ability to create test scripts/plans
- Quality Assurance experience with Web Services
- Oracle SQL (PL/SQL) querying skills are needed for this role
- Experience in the healthcare insurance industry supporting FACETS environments is preferred
- Familiarity with open source languages like Java and Angular (desired, not required)

Experience Requirements

- At least 5 year of experience working on an agile software development project in quality assurance roles

Job Description

Education Requirements

- Bachelor's degree or equivalent experience required
