

System Analyst

Bravo LT needs you to be a part of our highly motivated group of technology experts. We share a passion for technology and the community we serve, and we are committed to building long-lasting, productive relationships. We focus on giving back to the community, positively impacting society, and providing quality solutions that work. We believe in Autonomy, Mastery and Purpose and in trusting people to do the right thing - and we think Bravo LT is a pretty great place to be a part of.

Responsibilities

- Loves to be a problem solver
- Works with limited supervision on low complexity project tasks on a dedicated Agile Scrum team
- Assists in technology road mapping in a SAFe (Scaled Agile Framework) environment
- Actively participates in Program Increment (PI) Planning Days every quarter
- Contributes to the development efforts with current applications and implementation efforts in a .NET Framework
- Supports production systems by troubleshooting and resolving low complexity system/client issues
- Collaborates with subject matter experts and product owners to identify stories
- Interprets User Stories and converts them into usable features
- Identifies issues, develops alternatives
- Works independently on most tasks. Shares information readily.
- Communicates regularly, openly, and honestly with team lead
- Raises concerns appropriately to mitigate issues
- Codes or configures, tests, debugs, deploys, documents and maintains small to large programs
- Work in a team-based, collaborative environment following sound Agile principles
- Uses a variety of software development toolkits, programming languages, testing/verification applications and other tools

Skill Requirements

- Object Oriented Languages - .NET/C#
- AngularJS/7 (desired)
- JavaScript and/or TypeScript
- CSS/HTML5
- Git

Experience Requirements
