

Business Systems Analyst

Bravo LT needs you to be a part of our highly motivated group of technology experts. We share a passion for technology and the community we serve, and we are committed to building long-lasting, productive relationships. We focus on giving back to the community, positively impacting society, and providing quality solutions that work. We believe in autonomy, mastery and purpose and in trusting people to do the right thing - and we think Bravo LT is a pretty great place to be a part of.

Responsibilities

- Work closely with project managers, developers, business analysts, and stakeholders in an Agile development environment
- Review requirements specifications and technical design documents to provide timely and meaningful feedback
- Formulating and defining project scope and objectives through research and fact-finding
- Developing analysis of consumer and business needs for application development
- Documenting requirements/user stories and translating into proper product specifications
- Devising or modifying workflow and consumer experience to solve problems, considering back-end software applications capacity, data availability, and desired results
- Defining implementation procedures

Skill Requirements

- Excellent verbal and written communicator
- Effective and self-sufficient, flexible, and comfortable with change
- Analytical thinker
- Understand technical complexities
- Determine business scope requirements and communicate to developers

Experience Requirements

- Knowledge of object-oriented programming languages such as C# and Java
- Experience with Agile project methodology

Education Requirements

- Bachelor's degree or equivalent experience required
