

Salesforce Developer

Bravo LT needs you to be a part of our highly motivated group of technology experts. We share a passion for technology and the community we serve, and we are committed to building long-lasting, productive relationships. We focus on giving back to the community, positively impacting society, and providing quality solutions that work. We believe in autonomy, mastery and purpose and in trusting people to do the right thing - and we think Bravo LT is a pretty great place to be a part of.

The Bravo LT Software Developer possesses a deep understanding of the analysis, design, implementation, testing, and maintenance of web applications, from the backend to the frontend. A strong foundation in computer science, the object-oriented programming ecosystem, and modern web technologies are required.

Responsibilities

- Translate business requirements and user stories into functional applications
- Design, build, test, and maintain reusable and reliable code within Salesforce
- Ensure the best possible performance, quality, and responsiveness of Salesforce
- Identify and devise solutions to problems with functionality or performance of Salesforce
- Help maintain code quality, organization, and automation

Basic Qualifications

- Three or more years of experience in Salesforce
- Proficient with Apex, VisualForce, Triggers, Force.com, Web Services, Lightning, Native, MySQL and JavaScript
- Demonstrated experience working in medium to large scale Salesforce implementations (Service, Sales and Marketing)
- Solid understanding of object-oriented software design and related patterns
- Understanding of the Java programming language, to include Spring and REST
- Familiarity with relational databases and SQL
- Strong interpersonal and communication skills and the ability to interact with a diverse group of clients and colleagues at a high degree of professionalism
- Able to manage time effectively

Preferred Qualifications

- Salesforce Developer Certification
- Bachelor's degree or master's degree in Computer Science or closely related field
- Experience writing or maintaining externally-facing APIs (SOAP and/or REST APIs)
